

FLOODPLAIN MANAGEMENT 201 WORKSHOPS

The Colorado Water Conservation Board (CWCW) and the Colorado Association of Stormwater and Floodplain Managers (CASFM) proudly present a series of workshops on the basics of floodplain management. The target audience is 1) new or experienced local floodplain administrators, 2) local emergency managers, 3) local elected officials responsible for administering the National Flood Insurance Program (NFIP), 4) other local government personnel involved with the NFIP, and 5) consultants or others interested in the topics outlined below. It is highly recommended that local floodplain administrators attend, regardless of their level of experience. Although this workshop builds on the concepts discussed in last year's FPM 101 workshops, attendance at those workshops should NOT be considered mandatory or a prerequisite to benefit from this course.

This course will be preapproved for credit for the Certified Floodplain Manager (CFM) program. For information on taking this exam, or for information regarding the CFM program or registration, please see the CASFM website, www.casfm.org.

The workshop locations and dates are as follows:

August 9 – Durango - Location TBD

August 10 – Glenwood Springs – Location TBD

August 11 – Colorado Springs – Location TBD

August 12 – Greeley – Location TBD

Exact locations of the workshops within the above-referenced cities will be announced soon. The CASFM mailing list will be notified by email, and information will be posted on the CASFM website.

Workshops are scheduled for 9:00 a.m. to 4:30 p.m. each day. The agenda and covered topics is attached. Workshop registration includes workbook and handouts and is **\$40.00**. Lunch will be on your own. Please make registration checks payable to CASFM. You are also welcome to pay at the door, **but advance registration is required.**
