

COURSE DESCRIPTION

This training course is designed for construction site storm water inspectors of Best Management Practices (BMP's) used to control erosion and sedimentation. The course covers preparing for and conducting a comprehensive inspection of a CDPHE *Storm Water Discharges Associated with Construction Activity* permitted site. Specific features of this course will address topics to prepare inspectors for consistent inspection procedures.

COURSE OBJECTIVES

Upon completion of this course, students will be able to:

- List the CDPHE storm water permit conditions
- Describe procedures for conducting on-site inspections for permit compliance and completing the subsequent report
- Prepare for the inspection
- Describe the record keeping requirements for permitted sites
- Collect and document photographic examples of issues and concerns
- Examine appropriate applications, installations and Maintenance of Construction BMP Features
- Review on-site procedural BMP's
- Generate a report to document findings

PREREQUISITE:

Prior attendance at CDOT ECS and SWMP classes or equivalent.
