Call for Project Awards

Nominations for Outstanding Construction Projects

Beginning in 2020, the Colorado Association of Stormwater & Floodplain Managers (CASFM) Engineering Excellence Project Award was divided into two main categories: Construction and Non-Construction projects. The awards will be given in alternating years. For 2023, the Engineering Excellence Project Award was awarded to a Non-Construction project.

For 2024, CASFM is soliciting Construction project nominees that focus on constructed improvements. Eligible entries for the award need to have been completed between May 2022 to May 2024. If there are questions regarding eligibility of your project, please reach out to Jeff Battiste ahead of submitting (see contact info below).

Eligible entries will be selected for presentation at the 2024 CASFM Conference. Attendees will vote at the conclusion of the presentations, and the entry receiving the most votes will receive the 2024 CASFM Engineering Excellence Project Award.

Eligibility

Entries must be completed between May 2022 and May 2024. Entries may be public or private ownership. Submittals may be made by the designer and/or owner. Entries submitted in previous years are ineligible.

Submittal Materials

Submit a project description, three (3) pages maximum. Pages must be 8.5x11", but one of the pages can be in an 11x17" format. The page limit includes tables, figures, photographs, and other graphical representations. An additional cover page can be included that does not count toward the three (3) page maximum. The font size for all included text should be no smaller than 10 point. The submittal may include links to project websites, ArcGIS StoryMaps, or other web-based project information.

Judging Criteria

Selected entries will be presented at the 2024 Conference. The final nominees will be responsible for a live presentation during the conference. Additional details regarding the presentation and conference formats, along with the presentation schedule, will be provided at a later date.

Successful entries will clearly answer the following:

1. Does the project enhance the public health, safety, and welfare? Or does the project provide significant environmental or ecological benefit?
2. Does the project incorporate creative, unique, or innovative solutions?
3. Can the project serve as a model for other communities and/or projects?

Submittal Process

Please provide the submittal as a PDF via email to jbattiste@mhfd.org.

Please note that all presenters are required to be paid and registered conference attendees. Current information on the conference will be posted on the website at casfm.org/annual-conference/ as it becomes available.

A total of 12 CEUs are possible by attending the conference.
